1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-22 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 30-35 of copending Application No. 11/013842.

Although the conflicting claims are not identical, they are not patentably distinct from each other because particularly claims 30-35 of the '842 application define a material including two cemented carbide phases, including a dispersed phase having a contiguity ratio and hardness substantially the same as that of the instant claims. While the '842 claims are limited to a cutting insert and the present claims contain no such limitation, it would appear that products meeting the limitations of the '842 claims would also fall within the scope of the instant claims. Thus, no patentable distinction is seen between the materials defined in the two sets of claims.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

3. In a response filed August 27, 2007, Applicant provides evidence in the form of a Declaration by Dr. Mirchandani indicating that the contiguity ratio as presently claimed is not present in the closest prior art (the examples of the previously applied Jacobs et al. patent). The examiner agrees that Jacobs does not specifically disclose nor render obvious a material having the presently claimed contiguity ratio. Further, the present specification sets forth numerous examples and data indicating unexpected and/or unobvious results arising from the use of a material with the presently claimed contiguity ratio. Thus, the rejection based on Jacobs is withdrawn.

Applicant further states that the examiner should withdraw the obviousness-type double patenting (ODP) rejection because the present application is the earlier-filed application (with respect to the '842 application) and the ODP rejection is the only remaining rejection in the present application. The examiner is not withdrawing the ODP rejection at this time because the relevant portion of MPEP section 804 states:

If a "provisional" nonstatutory obviousness-type double patenting (ODP) rejection is the only rejection remaining in the earlier filed of the two pending applications, **while the later-filed application is rejectable on other grounds**, the examiner should withdraw that rejection and permit the earlier-filed application to issue as a patent without a terminal disclaimer. [emphasis added].

At present, the later-filed application (the '842 application) is not subject to any grounds of rejection.

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to George Wyszomierski whose telephone number is (571) 272-1252. The examiner can normally be reached on Monday thru Friday from 8:00 a.m. to 4:30 p.m. Eastern time.
